

Khan Academy

1. Parents should visit Khan Academy website and create a parent account.
2. On the home screen, in the top right corner click on your username. A drop down menu will appear. Select add children.
3. Create a safe username and password for your child. It is important to allow students to add additional coaches(repeat as needed for more than one student)
4. Once you have created your student(s) account select their name (in green). This will take you to the activity summary page.

5. Under the students name, select view profile. Go to coaches tab. Enter the class code and join class

6. Have student login and follow the prompts. In the top left corner a notification will appear. This shows that your student was assigned a mission. The mission is what students should work on over the summer.
